ABOUT

Software Developer with a strong foundation in frontend development using React and backend development using Java, Spring Boot, and MySQL. Passionate about building responsive, scalable, and user-friendly web applications with clean, maintainable code. Skilled in developing full-stack projects and collaborating effectively in team environments. Seeking a Software Developer role to contribute to building high-quality applications while continuously learning and growing in modern technologies.

EDUCATION

- Rajarambapu Institute of Technology, Sangli** June 2023 - June 2027
B.Tech (Computer Engineering)
 - CGPA: 8.28
- GDP Malshiras** Feb 2023
HSC
 - Percentage: 78.00%
- GDP Malshiras** July 2021
SSC
 - Percentage: 84.20%

EXPERIENCE

- Team Lead – Academic Projects**
 - Led a team in the successful completion of academic software projects.
 - Planned project timelines, assigned tasks, and monitored progress to ensure timely delivery.
 - Coordinated team discussions, resolved technical challenges, and maintained effective collaboration.

SKILLS

- Programming Languages:** C, Java, JavaScript
- Frontend:** HTML, CSS, React.js
- Backend:** Spring Boot
- Database:** MySQL
- Tools:** Git, GitHub, Maven, Postman, IntelliJ IDEA, Visual Studio Code
- Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)

PROJECTS

- Online Shopping Management System** Dec 2025
Technologies Used: Java, Spring Boot, Spring Security, Hibernate, MySQL
 - Developed a backend-based online shopping management system using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL, supporting user, shop, product, order, and payment management.
 - Implemented Role-Based Access Control across Super Admin, Shop Manager, and Customer roles using Spring Security, JWT, and OAuth2.
 - Designed and developed RESTful APIs with DTOs, Mapper architecture, JPA relationships, validation, exception handling, and transactional workflows for secure and reliable business operations.
- Smart Data Retention System** May 2026
Technologies Used: Java, Spring Boot, MySQL, Hibernate
 - Developed a policy-driven data retention system to automatically identify, archive, and securely purge expired database records based on defined retention rules.
 - Implemented dynamic database schema inspection using JDBC DatabaseMetaData and built transactional archival pipelines using JdbcTemplate and @Transactional.
 - Developed RESTful APIs for managing retention policies, database tables, archival operations, and system execution data.

CERTIFICATION AND ACHIEVEMENTS

- Full Stack Java Developer Certification – AICTE | Sep 2025
- Data Structures and Algorithms – Infosys Springboard | Sep 2024
- HTML5 and CSS3 Advanced Training – Infosys Springboard | March 2025
- Problem Solving: 300+ problems on GeeksforGeeks and 100+ problems on LeetCode.
